Additional Information For cleaning / polishing of products, use only a soft, dry, clean cloth. Ensure that the mains supply is isolated before commencing installation and refer to the circuit diagram with the relevant product. Bare earth cables must always be covered with appropriate sleeving and wired to the earth terminal. With the reduced housing height, the module is suitable for mounting directly above another MD9014 on a multi-tier mounting plate. If mounting above each other and/or next to each other, take note of the loading of each module to prevent the potential of overheating.
